RE: Superfund §103 (c) Site Notifications

Dear Sirs:

Enclosed are site notifications for present and former plants of Allied Corporation and its wholly-owned subsidiaries as required by §103 (c) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980. Such plants are located in your region.

The information forwarded herewith and to other EPA regions represents the end product of 4,000 manhours of time by dozens of persons reviewing literally thousands of files and other records. However, because Allied Corporation is very large, having approximately 150 operating facilities in about 35 different states and many more throughout the world, over 46,000 employees, and countless files and records dealing with current or former facilities, it is impossible to assure that the information contained in the site notifications is all the information in Allied's possession or otherwise available to it.

Note that as an accommodation, the enclosed site notifications contain information concerning substances that are or were recycled and reused. By including such information we are by no means admitting that recycled and reused materials are subject to the Resource, Conservation and Recovery Act. In this connection, please refer to Shell Oil v. EPA and consolidated cases, (D.C. Cir. -- No. 80-1532).

If additional relevant information responsive to the EPA site notification requirements is subsequently discovered, it will be submitted to you.

Very truly yours,

William M. Reiter
